<p>Our Dynamic Books Catalogue Collection is part of our work to create Beneficial Change and contain some of the many voices from our global network</p> <p>Please note: Unlike other publishers, our books are part of our Policy Changing and Campaigning work. Every book you buy will help us be even more effective in this work. Therefore we value them very highly and they contain the voices of our networks. We love them very much and always like them all to go to a good home, where the reader will enjoy them, love them as much as we do and use them to make their own waves of change for the benefit of nature, other species, the planet and its systems and especially to help other people and create social and environmental justice and economics reform for everyone's benefit.</p> <p>Therefore please contact us about the books that you would like to read. We would be most pleased to hear from you.</p>			

Kind regards, the Green Economics Institute Publishing House Team. Wishing all our readers and writers a Very Happy New Year and Season's Greetings. Our thoughts are also with all of us affected by The March of Climate Change and its devastating impacts, as we know many of our readers are indeed being affected!

We will be working all through the year 2016 to ensure the COP21 agreement is implemented and operationalised and that it becomes legally binding, transparent, and goes much faster, in order to ensure that the rhetoric, and the INDCs match the science, so that the world, finally gets on track for 1.5 degrees, rather than the dangerous path it is still on today, which could be as high as 5 degrees, unless we stop business as usual and deliberately alter the course we are currently on.

Do come and join us, Do read some of our books, Do take part in our global movement for beneficial change for all of us.

Happy New Year from The Green Economics Institute
