### Our Academic Journal Invitation to write

We are always pleased to receive articles for our academic journal which is for the library market and comes out 4 times a year. It is academic, with Harvard style referencing, no footnotes, and is *double blind peer reviewed*. Many of our writers have enhanced their careers by publishing in our journal, for example promotion to Professor or becoming a Director of a major NGO or business and many other improvements to their careers or getting jobs they had always dreamed of.

There is a queue to get into this popular journal – the first and only one of its kind in the world. It is ground breaking and launched green economics and the green economy globally. Founded by Miriam Kennet in 2003.

We welcome diverse contributions and we especially welcome and help with contributions from new writers or other ideas. The writing for the journal has to be between 2500 and 7000 words. We cover academic, polemic, simple and more complex writing, political, academic, campaigning and business styles of writing.

For 2012 -we have places for 4 issues and about 8 articles in each so up to 32 articles in 2012. So please send in your articles as soon as possible. They can take several months to double blind review.

Please ensure you cite any items you have not written yourself and photos must all be attributed to who took them. References must be Harvard style- and we do not accept footnotes. Please ask for further information or guidance if you need it. Please ensure you do not infringe anyone else's copyright.

All articles printed in this journal, become the copyright and are then owned by the publisher Inderscience, so that the Institute and the author lose all rights to the writing and its use afterwards. Inderscience publishes the academic journal for us. All other items are published by the Green Economics Institute and we

do not take copyright or ownership of your work. ( We, the Green Economics Institute, and our own publications only request Permission to Publish). Our other book publishers also do not take ownership either. Please check with us fully for more clarification on all aspects of Intellectual Property. Please bear this in mind when submitting articles. If you need more explanation of how this works and the advantages and disadvantages and how to navigate through this complex area, please email or telephone us to help you decide how and what to choose to publish and we are pleased to advise you on this.

However, all our writers do get an academic citation, including in google scholar and many of the search engines used by Universities and the journal is read in every continent and in some of the most prestigious libraries on the planet so it will get your ideas out around the world!

*We are very keen to encourage new writers and new ideas as well as more experienced writers and academics and policy makers and business people and campaigners. All the issues are gender balanced and diverse and are written by people from all corners of the earth.*

We look forward to hearing from you very soon and to your writing for this exciting journal. We have received compliments from Princes, Members of Parliament and all sorts of organisations such as the International Labour Organisation and the United Nations and OECD. Please email us in the first instance to discuss your idea and we will be very keen to encourage you and help you during the writing. All we look for are the ideas, and we can develop any good ideas with you into a piece of suitable writing and we specialise in developing new writers and publishing new and other voices which are not usually heard!  
Email us today with your idea for an article or book review- [greenecomicsinstitute@yahoo.com](mailto:greenecomicsinstitute@yahoo.com)

## **Description of the aims of the journal**

*written by Miriam Kennet and Volker Heinemann*

***IJGE, a peer-reviewed international journal, proposes and fosters discussion on all aspects of Green Economics. It contributes to international research and practice in Green Economics with the aim of encouraging economic change and the positioning of Green Economics at the centre of the Economics disciplines. Green Economic theories and policies, tools, instruments and metrics are developed with the aim of offering practical and theoretical solutions and proposals to facilitate a change to the current economic models for the benefit of the widest number of people and the planet as a whole.***

The objectives of *IJGE* are to establish an effective channel of communication between policy makers, government agencies, academic and research institutions concerned with

the running, involvement and impact of the economy on all sections of society. It aims to bridge the gap between academic economic theory and the literature and suggestions for the implementation of modern concepts in the political economy and the general economic debate, structures of political power and public discussion.

The development of an alternative view in contrast to the traditional normatively biased view of economics is the prime objective. The study of Green Economics naturally has to be very multi and interdisciplinary in nature, as the problems it addresses are partly social in aspect and causes, partly scientific in technical development, partly environmental as this is a fundamental limit to all human activity and partly economic and historical in how the current situations have evolved. Green Economics is also particularly influenced by developments in ethical thinking and values and in anthropology in its explanations of past and future trends.

The scope of *IJGE* includes examining, critiquing and analysing the activities of corporations with particular reference to the localisation/globalisation debate and making suggestions for change in practise and general function and approach. *IJGE* takes an international perspective, as modern economies are interdependent and internationally linked; the Green Economics discipline has therefore to be international in scope and in the solutions it proposes. The advisory board and activities are international in nature and the main management board consists of German, English, Brazilian and US personnel, with branches in Brazil and the US. The advisory board consists of a host of academics and practitioners, government members, policy makers and campaigners from round the world in order to meet the demands and the wide scope of the subject.

### 🕒 Readership

*IJGE* provides a vehicle to help professionals, academics, researchers, policy makers and campaigners working in the fields of international business, economics and local, regional and national government to educate, influence, lobby and share information and to learn from each others' work and best practice in the field as well as to provide a forum to explore new solutions to economic problems.

### 🕒 Contents

*IJGE* publishes original papers, review papers, technical reports, case studies, conference reports, management reports, book reviews, notes, commentaries and news. Special issues will be devoted to subjects such as globalisation/localisation, international economics etc. Our wide and very experienced advisory board (which is additional to our academic panel) are particularly being asked to develop topical and important subjects over time which they believe from their work and research to be of most relevance and interest.

### 🕒 Subject Coverage

[The following list is not exhaustive, as new ideas and concepts are continuously assessed]

#### *Theories and concepts*

- Economic discourse and disciplines, compared, critiqued and contrasted in order to position Green Economics - including the following subjects
- Environmental economics
- Welfare economics
- Development economics
- Fairtrade
- Aid
- Freedom
- Costing resources
- Neo classical

- Neo Marxist
- Neo colonial
- Eco socialism
- Eco feminism and women's economics
- Patriarchy and accumulation: problems in resource allocation
- Foreign direct investment
- Trickle down theories
- Game theory
- New theories of human needs hierarchy vs. supply and demand
- Human happiness
- Implementation problems and issues in government

### *Structural Questions - International Institutions*

- Bretton Woods
- EU
- UN
- IMF
- World Bank
- WTO
- GATT
- Democracy and privatisation
- Buying politics - war, the arms trade, oil and the war on terrorism
- Trading blocks
- New protectionism
- International governance
- Tobin tax
- Off shoring
- Outsourcing
- Multinationals and tariff barriers

### *New initiatives and cases, experience and applications*

- Green solutions
- Eco taxes
- Resource management
- New economic indicators
- Zero waste
- Site here to sell here
- Reuse
- Recycle, repair
- Quality of life and consumerism
- Co-ops
- Land value issues
- Resource valuation
- New paradigms of the economy: nature, colonies, biosphere, non human species, women minorities
- Questions of 10,000 years of agriculture and patriarchy dominating the economy
- Post agricultural social and economic requirements and organisation
- Planning to reduce surplus and not to harness it for power over others
- Inclusive, participatory practices

- Polluter pays

#### *Critique of corporate activity*

- Triple bottom line
- Stakeholder perspectives
- Roles and activity within multinationals
- Consumerism
- Procurement
- Processes of globalisation at a practical level
- Corporate governance
- Environmental management as an industry
- Eco-labelling
- Limiting the power of the multinationals
- Shareholding as a means of gaining influence on the board
- Grass roots activism
- Civil society and attitudes to acceptable economic activity

#### *Social justice in the economy*

- Indigenous rights
- Less developed countries
- Subsistence economies
- Purchasing power parity
- Balance of rich and poor in different societies
- Poverty and its effects
- Poverty and its definitions
- Quality of life indicators
- Tools for ensuring that policies involve justice
- Environmental justice and consequences of a lack of it

### **Specific Notes for Authors**

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. (N.B. Conference papers may only be submitted if the paper was not originally copyrighted and if it has been completely re-written).

All papers are refereed through a double blind process.

For all papers, submissions, writing and ideas please email the Editors Miriam Kennet UK and Kristina Jociute Lithuania at [greenecomicsinstitute@yahoo.com](mailto:greenecomicsinstitute@yahoo.com)
